

Integrated Management System (IMS) Policy

We at Orb Energy Private Limited, a manufacturer of solar photovoltaic modules and solar energy systems, will work continuously to enhance the performance of our integrated management system, which combines quality, environmental responsibility, occupational health and safety.

We are committed to:

- ✓ Satisfying the needs and expectations of customers and other stakeholders by upholding high standards in the design, manufacturing, financing, installation, and after-sales service of our solar energy systems.
- ✓ Assisting customers in accessing and utilising solar energy in their daily lives, thereby creating a positive impact on the environment.
- ✓ Providing a safe and healthy working environment for all of our employees and contract workers, as well as minimising the environmental impact of our activities.
- ✓ Preventing pollution, ill health, and injury as a result of our activities.
- ✓ Protecting the environment.
- ✓ Eliminating hazards, and reducing OHS risks in the workplace.
- ✓ Complying with applicable statutory, regulatory, and other requirements concerning environmental and occupational health and safety hazards.
- ✓ Creating environmental and safety awareness among all our stakeholders.
- ✓ Involving workers and their representatives in the consultation and implementation of the QEOHS system.
